Profile

Full-stack software engineer with **4.2+ years of experience** in building, scaling, and optimizing enterprise grade web platforms. Proven track record in **high-performance microservices**, **cost optimization**, and **front-to-back delivery leadership**. Skilled in distributed architectures, asynchronous messaging, and rigorous testing frameworks across **Java, Spring Boot, React, and Azure**.

Technical Skills

- **Languages:** Java, TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Backend & Databases:** Spring Boot, Node.js, Kafka, Redis, MongoDB, MySQL
- **Frontend:** React, Redux, TypeScript, JavaScript
- **Cloud/DevOps:** Azure, Docker, Kubernetes, Jenkins, GitHub Actions, UCD, Linux
- **Tools:** JIRA, IntelliJ IDEA, VS Code, Postman, GitHub Copilot, JUnit, Mockito, Jest

Professional Experience

Infosys Ltd

Jun 2022 – Present

Specialist Programmer L2

Nagpur, India

- Acted as technical pivot for a 5-engineer pod delivering mission-critical U.S. healthcare applications; spearheaded development, deployment, and architecture across 12+ RESTful microservices.
- Optimized Spring Boot microservices using multithreading, Redis caching, and Kafka asynchronous messaging, reducing average latency by 4X and enabling real-time claims processing for millions of monthly requests.
- Cut React frontend bundle size by 70% with NGINX compression and CDN caching, improving load times for 10K+ concurrent users and accelerating patient onboarding workflows.
- Automated CI/CD pipelines via Jenkins, GitHub Actions, and Azure App Service, reducing deployment cycles from 2 hours to under 15 minutes; ensured robust code coverage utilizing JUnit, Mockito, and Jest.
- Configured distributed tracing and monitoring across microservices using Prometheus, Grafana, and ELK Stack; established threshold-based alerting that cut Mean Time to Detection (MTTD) by 40% and maintained a 99.9% SLA.
- Integrated OAuth2.0 and Role-Based Access Control (RBAC) with Spring Security, enforcing strict data privacy standards and securing sensitive patient health information (PHI) across all external endpoints.
- Established strict code review workflows, custom linting rules, and SonarQube integrations, improving code quality scores by 35% and reducing production bugs by 50%.

Persistent Systems

Jan 2022 – Jun 2022

Academic Intern

Nagpur, India

- Designed and deployed a full-stack React and Node.js web application, optimizing API endpoints to successfully support up to 2,000 requests/hour with seamless performance.
- Built APIs with MongoDB backend and delivered features for seamless student-instructor interaction.
- Authored comprehensive unit and integration tests using Jest, achieving 80%+ code coverage and minimizing regression bugs during weekly Agile sprint releases.

Projects

Scalable Fintech Platform | Java, Spring Boot, React, MySQL, Redux, JWT

Engineered a modular fintech web application with secure JWT authentication, real-time analytics, and horizontal scaling through optimized MySQL indexing and Spring Data JPA.

Education

Yeshwantrao Chavan College of Engineering

2018 – 2022

Bachelor of Engineering in Information Technology, CGPA: 9.1

Nagpur, India

Awards & Certifications

- Microsoft Certified Azure Developer Associate (AZ-204)
- Microsoft Certified Azure Fundamentals (AZ-900)
- 4x Infosys Insta Award Winner (2022–2025 for outstanding technical delivery and continuous excellence)
