Profile

Full-stack software engineer with **3.5+ years of experience** in building, scaling, and optimizing enterprise grade web platforms. Proven track record in **high-performance microservices**, **cost optimization**, and **front-to-back delivery leadership**. Skilled in leveraging **Generative AI** tools to enhance application development efficiency and innovation across **Java, Spring Boot, React, Microservices, and Azure**.

Technical Skills

- **Languages:** Java, TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Backend & Databases:** Spring Boot, Node.js, MongoDB, MySQL
- **Frontend:** React, Redux, TypeScript, JavaScript
- **Cloud/DevOps:** Azure, Docker, Kubernetes, Jenkins, GitHub Actions, UCD, Linux
- **Tools:** JIRA, IntelliJ IDEA, VS Code, Postman, Github Copilot, GPT, AI SDKs, Prompt Engineering

Professional Experience

Infosys Ltd

Specialist Programmer

Jun 2022 – Present

Nagpur, India

- Led a cross-functional team of 5 engineers delivering mission-critical web and cloud applications for a U.S. healthcare client; owned development, deployment, and monitoring across multiple microservices.
- Optimized **Java Spring Boot microservices** using multithreading and caching, reducing average latency by **4X** while enabling real-time claims processing for millions of requests monthly.
- Cut **frontend bundle size by 70%** with NGINX compression and CDN caching, improving load times for 10K+ concurrent users and boosting application responsiveness.
- Automated CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment cycles from 2 hours to under 15 minutes and improving release reliability across all environments.
- Architected comprehensive monitoring infrastructure using Prometheus, ELK Stack, and AI-powered alerting systems, reducing MTTD by **40%** and achieving **99.9% uptime** across microservices.
- Mentored engineers and established AI-assisted code review workflows & custom linting rules, improving code quality scores by **35%** and reducing production bugs by **50%**, accelerating team velocity by 25%.

Persistent Systems

Academic Intern

Jan 2022 – Jun 2022

Nagpur, India

- Designed and developed a robust web app using React + Node.js, supporting up to 2,000 requests/hour on a free-tier cloud instance, ensuring stable performance and seamless user experience.
- Built APIs with MongoDB backend and delivered features for seamless student–instructor interaction.

Projects

- Engineered a scalable fintech web application using Java Spring Boot microservices and React/Redux with AI-powered transaction categorization, secure JWT authentication, and real-time account analytics
- Optimized database architecture with MySQL and Spring Data JPA while leveraging AI code generation tools to build modular Redux state management and enabling seamless horizontal scaling.

Education

Yeshwantrao Chavan College of Engineering

B.E. in Information Technology, CGPA: 9.1

2018 – 2022

Nagpur, India
